

## AGENDA

Tuesday June 13, 2023

Carlisle Borough Hall at 53 W. South St. Carlisle, PA 17013

---

8:30 AM    **Registration: Prior registration required, no walk-ins.**

---

9:30 AM    **WELCOME and Introduction of the Board:** *Anita Martin, President*

---

9:45 AM    **Method Update Rule**

William Lipps, Shimadzu

This presentation will provide a quick overview of the most used organic analyte methods in the SDWA, CWA, and RCRA programs with a brief discussion between the differences and similarities between them. In doing this we will highlight the recent CWA ATPs for Dioxins and Furans in an effort to explain why an ATP is needed for CWA, but not SDWA or RCRA; this helps point out subtle differences between the programs, including required QC, that could affect you in your lab's operation. In addition, we will also discuss sampling, and potential issues with sample preservation. (The goal would be providing a systematic approach so people could find the right method, per program, and then go through it and make their own check lists of important stuff to watch out for, and assume the assessor would find the same thing).

---

10:15 AM    **Vendor Introduction/Networking Break**

---

10:30 AM    **Roundtable Happenings in Your Laboratory:**

Association Members and Board Members

---

11:30 AM    **Vendor Introduction**

---

11:45PM    **Lunch**

---

12:45     **Standard Methods 24<sup>th</sup> Edition Updates**

William Lipps, Shimadzu

This presentation will provide a quick overview of the most used inorganic anions and metal analyte methods in the SDWA, CWA programs with a brief discussion between the differences and similarities between them. This presentation will address the new editions of Standard Methods and the latest EPA method updates that included new and revised ASTM and Standard Methods. This session is intended to be an open discussion with focus on demand, nutrients, cyanide, and similar methods.

---

1:30 PM     **PADEP Updates**

**Annmarie Beach**, *Laboratory Accreditation Program Chief, PADEP  
Bureau of Laboratories*

Ms. Beach will provide an update for Lab Accreditation
